

# **Travel Clinics**

Last Reviewed – October 2012

Please note that in some instances the Holmes Chapel Health Centre may not be able to accommodate all of the needs and requirements of a patient in the administration of travel vaccinations. Examples of such scenarios could include:

- Travel vaccinations required at short notice – the Health Centre requires that patients contact us at least six weeks before the travel start date in order for us to accommodate your travel vaccine requirements.
- Non-NHS travel vaccinations, not administered at the Holmes Chapel Health Centre.

In these situations, patients may engage with an independent travel clinic. To aid you in finding an independent travel clinic we have listed below a number of companies which provide these services. Please note that the Holmes Chapel Health Centre can not be held accountable for the service provided by the companies below, we are simply replicating information that patients could easily find via an Internet search.
